

European Association of
Pharma Biotechnology (EAPB)

The EAPB is the only European society solely devoted to Pharmaceutical Biotechnology. EAPB with presently more than 900 members represents companies, scientific institutions and scientists with activities in this area of Biotechnology. Especially the co-operations with the EFB and the European regulatory organizations MEGRA and PEFRAS will contribute to achieving the aims of EAPB.

EAPB AND TURKEY

The Controlled Release Society Local Chapter of Turkey organizes a one day symposium every two years. The "Third Controlled Release Systems Symposium" entitled "Controlled Release Dosage Forms: Regulations and Market Trends in European Union and in Turkey" is planned to take place on May 16, 2003 in the Hotel Conrad International-Istanbul with the participation of six lecturers. The language of the symposium will be English and be held under the auspices of EAPB. The meeting will focus on the current regulatory standards, as well as the developing regulatory standards and the market trends in EU and in Turkey, because in order to establish a successful controlled release dosage form it is important to understand the drug regulatory requirements needed for drug approval and the trends in the major markets. During the symposium, interested companies will have the opportunity to exhibit their products and services used in the controlled release area with the aid of posters, video presentations and stands.
